TETSOPGUIM KEFOUEG FRANK PARKER

Full-Stack Software Engineer | AI Integration | Backend Architecture

Douala, Cameroon | +237 651-017-058 | kefoueg@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience building production-ready web systems across frontend, backend, and AI integration. Shipped AI-powered features using Anthropic Claude, OpenAI GPT, and AssemblyAI into live educational platforms serving students and teachers. Designed and deployed complete SaaS products end-to-end — from architecture and database schema to deployment, DNS, and client delivery. Comfortable in agile teams and as an independent contributor. Open to remote, hybrid, and on-site opportunities globally.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), PHP, Python, HTML5, CSS3
Frontend	React.js, Next.js (App Router, SSR/SSG), Tailwind CSS, Framer Motion, React Hook Form, Redux
Backend	Node.js, Express.js, Laravel, Prisma ORM, REST APIs, WebSockets (Pusher)
AI & Integrations	Anthropic Claude, OpenAI GPT, AssemblyAI, Google Cloud Speech & Vision, Tesseract.js, FFmpeg
Databases	PostgreSQL, MySQL, MongoDB, Redis, Prisma
Cloud & DevOps	Vercel, Cloudflare R2 (S3-compatible), Docker, VPS Deployment, DNS Configuration
Tools	Git, GitHub, Jira, Trello, Notion, Jest, Vitest, Agile/Scrum, vs code, cursorAI

PROFESSIONAL EXPERIENCE

Livquiz Ltd Sep 2023 – May 2025
Full-Stack Developer (Remote)
Toronto, Canada

- Translated Figma designs into pixel-perfect, responsive interfaces using React.js and Next.js — owning the quiz creation flow (manual and AI-assisted), community screen, personalized onboarding flow, and all marketing landing pages.
- Built a reusable component architecture and design system ensuring visual consistency and maintainability across the platform's frontend codebase.
- Implemented SSR and SSG strategies across key pages to improve Core Web Vitals, SEO performance, and initial load time.

- Integrated and consumed RESTful APIs across multiple features — handling data fetching, state management, error boundaries, and loading states for a seamless user experience.
- Engineered a standalone AI content-generation backend (13 service modules) abstracting Anthropic Claude and OpenAI GPT behind a unified interface — intelligent model selection, exponential-backoff retry logic, and provider switching via config.
- Built a multi-modal ingestion pipeline supporting 6 input modes across multiple platforms; implemented parallel batch processing via Promise.all reducing latency for 8+ question sets; designed 6-tier subscription enforcement middleware (Free → Enterprise).

Freelance Full-Stack Developer— Independent 2024 – Present
Full-Stack Developer (Solo, Client Project) Remote

Selected client project: CoachMe— a full-stack SaaS platform connecting certified fitness coaches with clients. Portfolio: kefoueg-frank.vercel.app.

- Designed system architecture for a multi-role SaaS platform (Admin / Coach / Client) with custom JWT-based RBAC, bcrypt hashing, and httpOnly cookie session management — full control over token lifecycle without third-party auth abstractions.
- Built real-time 1:1 messaging via Pusher WebSocket channels with database-level read-receipt tracking; optimised PostgreSQL schema with strategic Prisma @@index annotations — reducing query time from seconds to milliseconds.
- Integrated Cloudflare R2 for media storage (pre-signed URLs), Upstash Redis rate limiting, full i18n (EN/FR), and Vitest unit tests; owned the complete lifecycle from requirements to production deployment and DNS

Levegi Sarl Feb 2023 – Jul 2023
Full-Stack Developer — Internship Douala, Cameroon

- Built Ensemble.cm (Laravel + MySQL) — a social platform for blogging, job listings, and user interaction — including admin dashboard, role-based access control, and secure authentication.
- Developed the Trip Management System RESTful API: designed and documented endpoints for trip creation, updates, and user management with authentication, data validation, and RBAC.

KEY PROJECTS

AI Educational Content Generation Backend — *Node.js · TypeScript · Express · Anthropic Claude · OpenAI GPT · AssemblyAI · FFmpeg · Tesseract.js*

- Standalone REST API backend generating flashcards and quizzes from 6 input modes across multiple platforms — multi-provider AI abstraction, parallel batch processing, system prompt caching, and 6-tier subscription enforcement.
- 13 service modules · 6 quiz question types · 6 subscription tiers · multiple supported media platforms
- GitHub: codebase private — architecture walkthrough available on request

CoachMe — Fitness Coaching SaaS Platform — *Next.js 16 · TypeScript · PostgreSQL · Prisma · Pusher · Cloudflare R2 · Redis · Tailwind CSS*

- Production-deployed full-stack platform with multi-role auth, real-time messaging, coach verification workflow, secure media management, and full i18n (EN/FR). Owned the complete lifecycle from requirements to live deployment.

- Live: https://www.coachme-by-ecotofitness.com/ Delivered to client with domain, DNS, and hosting fully configured end-to-end.
- GitHub: codebase private — architecture walkthrough available on request

Ensemble.cm — Social & Professional Platform — *Laravel · MySQL · JavaScript*

- Web platform for blog publishing, user interaction, and job applications — built during Levegi internship. Admin dashboard, role-based access, and secure authentication.
- Live: https://ensemble.cm
- GitHub: codebase private — architecture walkthrough available on request

EDUCATION

Institut Universitaire des Grandes Écoles des Tropiques (IUGET) 2023 – 2024
Bachelor of Technology (B. Tech) — Software Engineering Douala, Cameroon

Institut Universitaire des Grandes Écoles des Tropiques (IUGET) 2020 – 2022
Higher National Diploma (HND) — Software Engineering Douala, Cameroon

LANGUAGES & SOFT SKILLS

English (Proficient) · French (Fluent)

Problem Solving · Critical Thinking · Communication · Adaptability · Fast Learning
